

FOCUS ON WILD FIRES IN 2021

This year again, **forest fires** have been hard a the world.

Several articles have been written on this subject, alarming about the extent and consequences of these fires for the year 2021, including the one below:

WILD FIRES IN 2021

With **187,114 fires burning** at the beginning of August, mainly in South Africa, the USA and the Mediterranean, we have broken the record for the **most daily fires ever recorded**. This number is monitored daily by **NASA's NOAA-20 satellite**.

You can find **in real time**, the observations made by **NASA** which shows the extent of forest fires around the world.

You can find the link below:

The phenomenon of forest fires **expands geographically and temporally** each year. Forest fires are increasingly starting to appear in winter or in northern regions of the world, which are not used to deal with forest fires.

The **causes** of the increase in these fires are mainly **human** (cigarette butts, wild fires, etc.), but also **climatic**. These disasters cause dramatic events such as pollution, loss of life, extinction of animal and plant species, destruction of material goods, etc.

POK FIGHTS AGAINST FOREST FIRES

In order to fight these devastating events, **POK** has developed a **whole range of products dedicated to forest fires**, including **nozzles, backpacks, taps, shutoffs, non-return valves, waterwall nozzles** and **dividers/wyes**.

These products have been designed to provide **solutions** for all situations that firefighters may encounter during a **wildland or forest firefight**.

You can find the range of forest fire products in our catalogue below:

[POK CATALOGUE](#)

Thus, each of the **POK** teams contributes in its own way to wildland firefighting.

Our Sales team remains at your disposal:
